SKILLS

WEB DEVELOPMENT: Ruby, Rails, JavaScript, jQuery, MEAN Stack, Git/GitHub, HTML/CSS, Bash, PostgreSQL

PROJECTS

HashRobot

HashRobot is an application which generates the most visible and used hashtags in a given category. Built with Rails, jQuery, Materialize CSS, and PostgreSQL. Hosted on Heroku.

WanderList

WanderList is an information service for people that are thinking of moving to a new city. It currently provides housing, demographic, and restaurant information to the user about a particular city. Built on the MEAN stack, hosted on Heroku.

Discovery Production Reports

Created a suite of Bash scripts to analyze incoming productions. Reports included the number of documents, pages, how much data, and a summary of what types of documents have been produced. Scripts exported in MySQL format for easy database loading.

Law Office of Daniel M. Shafer

Created and designed a website for a law office specializing in civil litigation, corporate, and entertainment law.
